Roger, Alan,

Thanks very much for this. As Alan pointed out in a later note there is alot of material (potentially) missing from this, but it is nevertheless useful as a guide through events.

After merely a preliminary glance through, however, I have no specific recommendations for additions. A rather detailed analysis of the purpose of such a timeline would need to be determined before the level of detail could be established - and at this point in time I would question the value of such an excercise (I think the return on the effort required is likely to be disproportionate!).

with kind regards,

Ruth

Subject: TimelineRepro

Dear Ruth,

FYI and as input to the Repro team please find attached a Timeline Alan Goldsmith has put together with major scientific events related to this subject. I don't know whether this is helpful for the group and I am anxious to hear what you think about it. If there is the need for further adding information into the file, please work with Alan directly.

Please make sure you open the file from the Windows Explorer and not from Word.

<< File: 2000-03-08 TimelineRepro.html >>

Good luck.

Roger
